Sponsorship proposal

The **International Conference on Quantum Physics and Logic (QPL)** celebrates its 21st edition from **July 15th to July 19th, 2024**, and invites the technology and production sectors to be part of this significant event that will bring together researchers from all around the world. This conference will have strong local and regional participation as it takes place in Latin America for the first time.

Since its first edition in Ottawa (Canada) in 2003, the conference has featured breakthroughs in the mathematical foundations of quantum physics, quantum computing, spatio-temporal causal structures, and related areas such as computational linguistics. Of particular interest are topics that use logical tools, ordered algebraic and category-theoretic structures, formal languages, semantical methods, and other computer science methods for the study of quantum behaviour in general. The scientific objective of the series is to gather the mathematical side of the quantum information community to present and discuss the latest groundbreaking results in the field.

We hope you will consider sponsoring QPL 2024. QPL attendees are Ph.D. students, postdoctoral scholars, and researchers from leading research groups in quantum information worldwide. We expect around 150 participants to attend the week-long program. Distinguished speakers from academia and industry will deliver plenary lectures on some of the latest developments in foundational quantum information. Short lectures and poster sessions will be held in two parallel sessions to accommodate many contributions and leave enough time for discussions.

To gather scientists from all over the world at minimal costs and offer them a pleasant time, we need financial capabilities. This will help fund the venue, the audio-video recording and broadcasting of the event, lunches, and coffee breaks, as well as travel grants for Ph.D. students who would not have the financial capabilities to attend otherwise.

The following page list a range of opportunities we offer our sponsors. As sponsors might have unique needs, we would be happy to discuss and accommodate combinations of the offered packages with your organization.

We invite you to join us for this event and be a part of this exciting journey towards better understanding the quantum world.

Cordially,

QPL 2024 Organising Committee

Sponsorship packages

	Diamond	Platinum	Gold	Silver
Logo in webpage (See 1)	1st row	2nd row	3rd row	4th row
Logo in printed program (See 1)	1st row	2nd row	3rd row	⊘
Marketing material distribution (See 2)	★	★	★	⊘
Free registration tickets	★★ 2	★ 1	⊘	⊘
Industry session (See 3)	★★ 20 min	★ 10 min	⊘	⊘
Banner at the conference venue (See 4)	★	⊘	⊘	⊘
Mention on student grants (See 5)	★	⊘	⊘	⊘
Value in euros	8,000	5,000	3,000	1,000

1. Logo in webpage and program

The website (<http://qpl2024.dc.uba.ar>) will include a sponsors section featuring the logos of the institutions and companies supporting the conference, with their sponsorship level reflected by the size of the logo and row.

The program will be printed in full colour featuring the sponsors' logos following the same scheme.

2. Marketing material distribution

The company can send marketing materials to be distributed by the organisers, or can even have a stand to distribute their own material.

The image on the right is from the Informatics Science School in July 2023, at the same venue, where some sponsors decided to bring their materials to distribute at their stands.

3. Industry session

As is customary in QPL, there will be a dedicated industrial session where sponsor companies can showcase their advancements in quantum computing or use the opportunity for promotional purposes, such as recruiting attendees from the conference.

4. Banner at the conference venue

The sponsor company can choose to either bring their own banner or provide us with high-quality printing instructions. This way, we can display the banner at the conference venue.

5. Mention on student grants

If the sponsorship amount permits, we will offer student grants in the name of the company.
